

McGuire Drive

DRAINAGE IMPROVEMENT PROJECT

Project Introduction

This proposed drainage improvement project will take place in the neighborhood that generally includes McGuire Drive, Chapel Drive, Legion Avenue, Bundy Avenue, Hollister Avenue, Richeson Avenue, and Evert Avenue. The project was initiated as a result of increased reports of issues with the existing drainage system, including flooding. The proposed improvements for the study area will be bounded as shown in the highlighted area on the figure below. The majority of existing drainage infrastructure consists of swales with culverts below driveways and roadway intersections. The existing infrastructure may require improvements to restore hydraulic connectivity and improve public health and safety.

Project Schedule

Project Assignment: September 2019 (Hazen and Sawyer, Inc.)

Survey & Preliminary Design: September–November 2019 (H&B Survey & Accumark)

Engineering Design: December 2019–June 2020 (Hazen and Sawyer, Inc.)

Construction Assignment: TBD

WHAT HAPPENS NEXT:

Field Investigation & Survey Work

Survey work will be performed by H&B Survey and Accumark to collect existing data for proposed design improvements. Residents may notice vehicles in the neighborhood and survey crews collecting data and performing field investigations. At times, the teams may need to access portions of private properties within the project area to collect information and to determine right of way boundaries.

Public Meeting

Public meetings will be held to present proposed improvements and receive feedback. Times and locations of these meetings will be announced as the project progresses.

Project Duration

The design and survey is planned to be completed by June 2020. The project will be advertised for construction in July 2020. Prior to the commencement of construction, a letter will be sent to adjacent property owners to notify the neighborhood of the start date.
