

# Norborne Road

## DRAINAGE IMPROVEMENT PROJECT

### Project Introduction

This drainage improvement project is being completed to reduce the frequency and severity of roadway flooding and to reduce maintenance costs incurred by the City for cleaning the drainage system. The project will result in improved drainage capacity and fewer clogs in the drainage system. Project work will take place primarily on Norborne Road north of Elmore Lane, including Elmore Lane, Rucker Lane, Oberlin Road, and Chatsworth Drive. It will also include the channel between Norborne Road at Elmore Lane and Pompey Springs Road. The project area is highlighted in blue on the map below.

### Project Schedule

**Project Assignment:** August 2019

**Survey & Preliminary Design:** Cardinal Surveying

**Engineering Design:** Woolpert

**Construction Assignment:** Summer 2020

# WHAT HAPPENS NEXT:

## Field Investigation & Survey Work

Survey work will be performed by Cardinal Surveying to collect existing data for proposed design improvements. Residents may notice vehicles in the neighborhood and survey crews collecting data and performing field investigations. At times, the teams may need to access portions of private properties within the project area to collect information and to determine right of way boundaries.

## Public Meeting

Public meetings will be held to present proposed improvements and receive feedback. Times and locations of these meetings will be announced as the project progresses.

## Project Duration

Overall, the design and survey is planned to begin on or around the first week of September 2019. The project will be advertised for construction in late 2019. Prior to the commencement of construction, a letter will be sent to adjacent property owners that will notify the neighborhood of the construction start date.
