

Cavalier Court

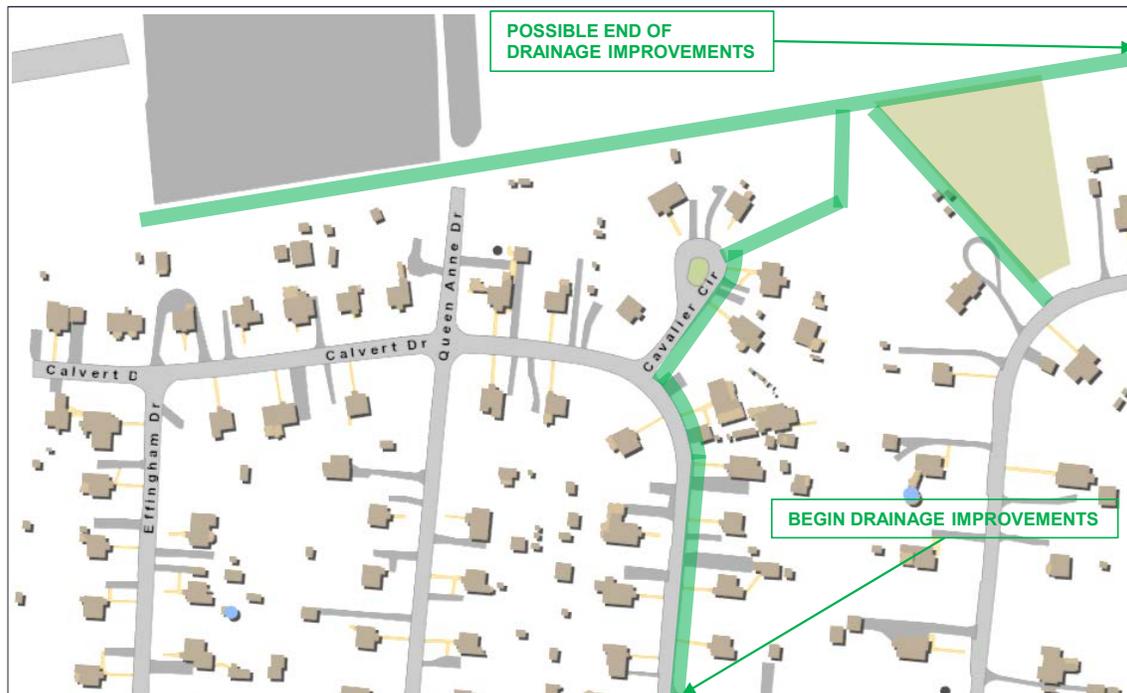

DRAINAGE IMPROVEMENT PROJECT

Project Introduction

The purpose of this correspondence is to make residents aware of the proposed drainage improvement project along Cavalier Court and Yorkshire Drive. This project was initiated as a result of standing water in ditches and a failing outfall culvert within the City easement. Issues include a lack of positive drainage throughout the area and possible drainage issues in adjacent channels and the overall outfall channel within the City easement.

The proposed improvements are bounded as shown in the highlighted area on the figure below, and will consist of:

- Replacement of the existing failing culvert at Cavalier Court
- Potential drainage improvements and grading of the outfall channel within the City easement to the north of Cavalier Drive between Effingham Drive and Circlewood Drive
- Potential drainage improvements and grading of the adjacent channel at the outfall of an existing culvert under Rosemont Road
- Improvements to the ditches along Cavalier Court and Yorkshire Drive to achieve positive drainage

Project Schedule

Project Assignment: August 2019 (RK&K)

Survey & Preliminary Design: September–October 2019 (H&B Survey)

Engineering Design: October 2019–April 2020 (RK&K)

Construction Assignment: TBD

WHAT HAPPENS NEXT:

Field Investigation & Survey Work

Survey work will be performed by H&B Survey to collect existing data for use in engineering design and development of construction drawings. RK&K staff will also be conducting field investigations. Residents may notice vehicles in the neighborhood and survey crews collecting data and performing field investigations. At times, the teams may need to access portions of private properties within the project area to collect information and to determine right of way boundaries.

Public Meeting

A public meeting will be held to present proposed improvements and obtain resident feedback. The time and location of this meeting will be announced as the project progresses.

Project Duration

Overall, the design is planned to be completed by April 2020. The project is planned to be advertised or assigned for construction in May 2020. Prior to the commencement of construction, a letter will be sent to adjacent property owners to notify residents of the start date.
