

# Woodhaven Drive

## DRAINAGE IMPROVEMENT PROJECT

### Project Introduction

The purpose of this correspondence is to make residents aware of the proposed drainage improvement project in the neighborhood that generally includes Circlewood Drive, Newkirk Drive, Woodhaven Drive, Shelby Drive, Red Oak Lane, and Alberene Road. This project was initiated as a result of increased reports of issues with the existing drainage system, including flooding.

The proposed improvements for the study area will be bounded as shown in the highlighted area on the figure below. Within the project area, the majority of drainage infrastructure consists of swales with culverts below driveways and roadway intersections. The existing infrastructure may require improvements to restore hydraulic connectivity and improve public health and safety.

### Project Schedule

**Project Assignment:** Spring 2020 (Hazen and Sawyer, Inc.)

**Survey & Preliminary Design:** Summer 2020 (H&B Survey and Accumark)

**Engineering Design:** 2020 (Hazen and Sawyer, Inc.)

**Construction Assignment:** TBD

# WHAT HAPPENS NEXT:

## Field Investigation & Survey Work

Survey work will be performed by H&B Survey and Accumark to collect existing data for proposed design improvements. Residents may notice vehicles in the neighborhood and survey crews collecting data and performing field investigations. At times, the teams may need to access portions of private properties within the project area to collect information and to determine right of way boundaries.

## Public Meeting

Public meetings will be held to present proposed improvements and receive feedback. Times and locations of these meetings will be announced as the project progresses.

## Project Duration

Overall, the design and survey is planned to be completed by spring 2021. The project will be advertised for construction after that. Prior to the commencement of construction, a letter will be sent to adjacent property owners to notify the neighborhood of the start date.
